

Design Recommendations

Bulk sharing

Send one or many files to multiple contacts

We suggest that Quick Share be able to send files to **several contacts at once**. This may be by either selecting contacts separately or **selecting a group of contacts** stored in the Contacts app of the phone.

Lock Selection

Selection of images and videos in gallery and File manager won't disappear even if the user failed to transfer with any of the apps in the share sheet. Selection will be locked when the user triggers the **pin button** and only deselects when the selection is unpinned.
